Skin is the largest organ of our body which most of us neglect till damage can be seen. Stress and harsh environmental effects like UV rays and pollution take their toll on skin unknowingly.

Dreaded clogged and enlarged pores, dull and dehydrated skin as well as dark spots are just a few of the many skin problems that come together with it.

The **NEW Essential Facial Plus** is reinvented to counter environmental irritation and premature aging to reveal softer, younger looking skin.

The Doctor says...

Employing the latest technology in therapeutic facials, the Derma-Infuser is a treatment which effectively removes dead skin cells and impurities, while simultaneously driving therapeutic solutions deep into the skin to target specific skin concerns. Depending on the condition-specific infusions or masks used, skin problems ranging from oily skin, acne, dullness, dryness, sensitivity, sun-damage, to hyperpigmentation and dark eye circles can all be treated. Results will continue to improve and be sustained with consistent treatments, as well as a proper maintenance skincare regime.
