EYES

RF Eye Rejuvenation Treatment

The eyes are the windows to your soul so give them the tender loving care they deserve with the all new Radio-Frequency (RF) Eye Rejuvenation Treatment, specially calibrated by DRx Medispa to target the sensitive skin around your peepers. With this revolutionary eye treatment, it is now possible to reverse the effects of time and gravity on your eyes. Expect brighter and more lifted eyes with repeated treatments, lines will be diminished and eye contours will be more defined and sculpted.

How does radio-frequency work?

Radio-frequency is the constant, gradual energy that is delivered into the deeper layers of the skin, resulting in the build-up of heat where the skin and fat layer meets. This increasing heat, which cannot be felt on the topmost layer of the skin, modifies the deep collagen layers, causing the fibres to contract while stimulating growth of new collagen over time. This results in firmer and radiant looking skin with regular treatments.

How does the Eye Treatment work?

Step 1: The first step helps to smooth out lines and wrinkles while lifting droopy skin, especially at the eyelids, targeting superficial tissues and fluids.

Step 2: The second step is to deliver heat energy to deep skin layers. This step is to eliminate the appearance of dark eye rings, as well as contour and de-puff the eye area.

Step 3: The final step is a massage to balance the muscle tone and to provide a soothing and pampering end to the procedure.

Results

- More defined and sculpted eye contours
- Reduction in fine lines and wrinkles around the eyes

Recommended usage

The Eye Treatment is recommended as an add-on to complement the DRx Medispa's facial treatments. The first three sessions should be conducted once every two weeks, followed by monthly session for maintenance.

For best results, apply the Derma-Rx Eye Serum to the eyes twice daily to restore hydration, increase elasticity and encourage cell renewal.

Duration

30 minutes

20 minutes as an add-on to any DRx Medispa's facial treatment
