**derma-Rx**  
**Non-Tinted Sunscreen SPF 50+**

The new non-tinted sunscreen SPF 50+ is a superior light, smooth sunscreen developed to provide the highest level of broad-spectrum UVA/UVB protection at a safe level. Primarily, this sunscreen provides a strong, protective base on which to start your daily make-up application.

The combined benefits of this innovative product include: the protection of your skin from harmful UV rays; water proof formulation which minimizes the need to constantly re-apply; superior transparency once applied, eliminating the white cast effect. If you are looking to protect your complexion on a daily basis with a safe and effective sunscreen, Derma-Rx Non-Tinted Sunscreen is the superior choice.

**Ingredients & benefits**

**Micro-fine Titanium Dioxide & Zinc Oxide**  
 To provide superior transparency without the white cast effect like those conventional physical sunscreens, while effectively protecting the skin against harmful UV rays.

**Resveratrol**  
 To provide powerful protection against skin damage caused by UV radiation while fighting against free radicals.

**Olive Leaf Extract**  
 Helps soothe and calm red and inflamed skin caused by overexposure to UV rays.

**derma-Rx**  
**Tinted Sunscreen SPF 50+**

Derma-Rx newly launched tinted sunscreen comes in 2 different shades, **cool beige** and **warm natural** that will protect all complexions whilst providing a smooth, matte foundation on which to apply your makeup!

The combined benefits of this innovative product include: the protection of your skin from harmful UV rays, delivery of a flawless natural finish as well as an even skin-tone. If you are looking to protect and perfect your complexion on a daily basis, look no further than Derma-Rx Tinted Sunscreen.
